

SOON Sponsorship Package

SOON Hackathon - Creating Something Out of Nothing

Hackathon. But at a mansion. Canada's Most Unique Hackathon.

50 hackers, 36 hours, 1 private house.

Location: Toronto / GTA | **Dates:** October 17–19, 2026

A hackathon is a short, high-energy building event where builders, engineers, and designers form teams and create working software projects within a limited time. At SOON, this will be a weekend where top builders live together, build together, and solve real company problems.

What Is SOON?

SOON gives sponsors direct access to 50 talented builders in a unique private-house setting, where companies can recruit talent, test products, build brand image, and turn real problems into working projects.

“With SOON, I want to create the most memorable hackathon experience ever: a space where hackers can bond organically, build real projects, and show their best abilities. We help companies bring their products to market, strengthen their branding, improve their products, and connect with some of the most talented builders in Canada.” — Jack

Format

- 36-hour hackathon
- 50 curated hackers
- Unique venue
- Teams of 1–4
- Overnight builder-house experience
- High-quality photo, video storytelling, documentary
- Sponsor challenges, judging, mentorship, and product activations

Key Metrics

Sponsorship impact

- 17 projects submitted
- 2 project ideas implemented into a real company's codebase
- 10 projects integrate all 7 of our sponsors' APIs/platforms

Social media coverage

- 300,000+ social media views
- 2,000+ photos and videos captured, including 1500+ images and 500+ videos

Talent distribution

- 250 applications for 50 confirmed hacker spots
- 70% of applicants had prior internship experience
- X/Y male and female hackers
- [include charts and graph]
- Hackers and judges have worked at leading companies, including: Amazon, AMD, AWS, Capital One, Cohere, IBM, Nasdaq, Robinhood, Roblox, Shopify, Uber, Wealthsimple
- Our students come from top schools, including the University of Toronto, the University of Waterloo, and Queen's University

Why Sponsor SOON?

Students are looking for more than another sponsor booth or brief conversation in passing. SOON offers the opportunity for sponsors to become part of the team and form real connections

- **Direct access to curated talent:** Meet a small group of talented builders drawn from top companies and schools.
- **Real product output:** Hackers can build around your API, dataset, platform, or company challenge.
- **High-touch recruiting:** Sponsors can mentor, judge, host coffee chats, review projects, and connect with hackers directly.

- **Stronger brand memory:** Your company becomes part of a unique private-house hackathon story, not just another sponsor table.
- **Content and storytelling:** SOON produces strong photo and video content before, during, and after the event.
- **Founder-style environment:** Sponsors meet builders in a relaxed, personal, and high-energy weekend setting.

Who Attends?

Expected Attendance

- 50 selected hackers
- 400+ applicants
- 15–20 teams
- 5–10 judges
- Sponsors, mentors, speakers, and community partners

Selection Criteria

Technical ability, project history, internship or build experience, hackathon experience, creativity, founder mindset, teamwork, and interest in building real products.

Sponsor Pathways (can mix and match)

1. Talent, Hiring, and Founder Access

For companies that want direct access to high-quality young builders. Sponsors can meet selected hackers, review hacker profiles, host private coffee chats, mentor teams, judge final projects, and connect with students.

Possible activations:

- Access opt-in hacker profiles, resumes, GitHub, LinkedIn, and portfolios
- Host private coffee chats or small-group networking
- Send representatives to mentor hackers during the weekend
- Host a private sponsor room or booth inside the house
- Judge final demos and identify top candidates
- Receive a post-event candidate shortlist or recruiting report

- Send post-event recruiting or founder-community follow-up

2. Branding, Developer Relations, and Go-to-Market

For companies that want hackers to know, use, and give feedback on their product. Sponsors can put their product, API, platform, or community in front of builders through demos and branded tracks.

Possible activations:

- Have hackers build with your API, product, dataset, or platform
- Host a product demo or technical workshop
- Provide API credits, cloud credits, software access, or developer resources
- Receive a report of user feedback after the event
- Be featured across SOON's website, social media, and event materials
- Be included in photo/video storytelling from the weekend

3. Product, Challenge, and Prototype Building

For companies that want hackers to build around a real company problem. Sponsors can bring a problem statement, theme, dataset, workflow, or internal challenge for hackers to solve during the weekend.

Possible activations:

- Create a custom company challenge
- Define the theme or problem statement hackers build around
- Provide datasets, internal workflow examples, or product context
- Judge solutions based on company-defined criteria
- Receive a post-event summary of submitted projects
- Explore long-term project continuation and IP handoff

Tier Details

Arche Sponsor - \$1,000 CAD:

- Best for basic visibility, community presence, and light access to builders.

Welcome Package	Logo included in sponsor section	Branded item or insert in welcome package	Dedicated sponsor page/section in welcome package
Priority Placement	Standard placement	Medium priority	Highest priority across website, deck, event materials, and recap

What Funding Supports

Sponsor funding helps cover the private house and venue, food and drinks, transportation, prizes, hardware and supplies, website and portal development, photo and video production, insurance, safety, and operations, the hacker experience, and post-event content and reporting.

Why SOON Is Different

Most hackathons optimize for scale. SOON optimizes for closeness, creativity, and intensity. Last time, our sponsors reported forming closer relationships with hackers, gaining insights, making connections, and receiving high-quality projects.
